conDP - the flexible tool for planning processes SUPPLY

Key Facts

- conDP is a flexible planning tool for supporting supply chain planning processes in SAP ERP
- It consists of two components: An intuitive User Interface based on state-of-the-art web technologies and an interface to SAP standard processes
- Thanks to comprehensive extension options, a wide range of planning scenarios are supported

Benefits

- Extensive selection options according to freely definable characteristics
- Definition of user-specific and/or general selections
- Definition of selection folder
- Convenient layout settings: filtering, condensing, sorting
- Show/hide layout areas for configurable user interface
- Seamless linking in SAP standard transactions such as SD documents directly from the web interface
- Configurable add-ons such as sales order overview incl. jump to SAP

Functions

- Planning table – writing data directly into personalized info structures
- Individual definition of characteristics and key figures
- Aggregation and pivoting
- Data saving
- Manual loading of data into/from the planning tableau through MS Excel integration
- Visual highlighting in the web interface according to customer requirements (variance quantities, etc.)
- Version and authorization management

Highlights

- Intuitive web UI based on modern web technologies
- Simulation of different planning scenarios
- Planning and execution take place in the same system
- Planning embedded in SAP logistics information system
- low complexity for both IT and end-users
- can be put into operation with minimal training effort

Technicals

- SAP ECC or S/4 HANA
