

conMill Suite - Mill Extension Package for SAP Digital Manufacturing

Key Facts

- conMill Suite closes the gaps between the unique requirements of the mill industry and the SAP Digital Manufacturing (DM) standard - All while adhering to the Clean-Core Paradigm.
- To extend the possibilities of SAP Digital Manufacturing, we have developed add-ons specialized on role based production.
- Our solution leverages the powerful low-code/no-code capabilities of SAP Digital Manufacturing to ensure flexibility and efficiency.

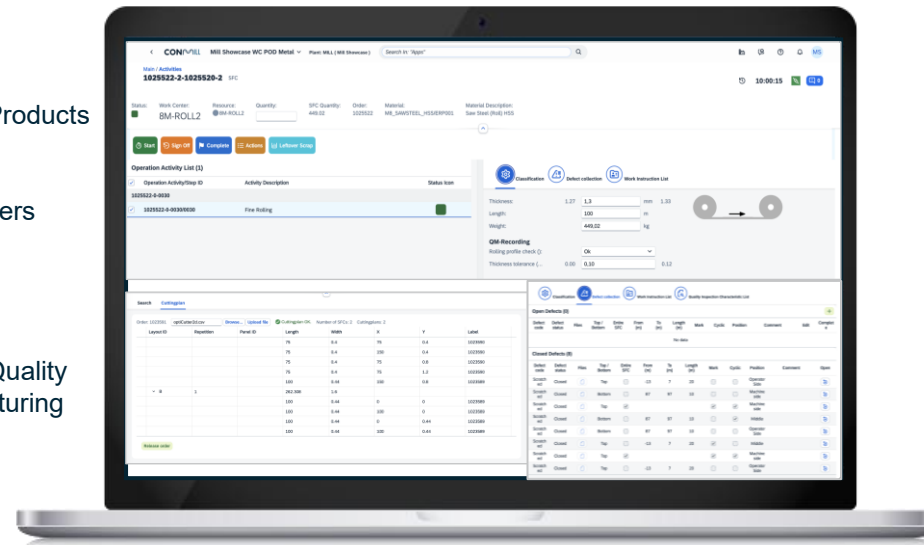

Benefits

- Seamless Integration: effortless integration within the SAP landscape for optimized processes
- Proven Solution: SAP DM is a mature technology backed by SAP's robust support.
- Industry-Specific Standards: provides standardized features tailored to the unique requirements of the mill industries:
- Customized Precision: fine-tuned functionalities designed to meet the specific needs of the sector

Functions

- Tailored Production with Configurable Products
- Flexible Material Management with Alternative Units
- Efficient Production with Combined Orders
- Efficient Order Execution with Block Management
- Streamlined Waste Management with Scrap Management
- Precision Error Capture for Enhanced Quality
- Optimized Cut Plans for Metal Manufacturing

Technicals

- Seamless integration with SAP DM Standard
- 100% upgrade and release capability
- Flexible architecture with or without HANA technology

Highlights

- Custom plugins - designed for specific production needs
- Custom production processes - tailored to the complexities of the mill industries
- Custom XSLT integration workflows - seamlessly process and integrate your data
- Custom Production Operator Dashboards (PODs) - user-friendly and customized interfaces
